A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated ▾

Ticket comments
The email below was an attempted phishing attack. There are many red flags and inconsistencies in regards to this email. The email is linked to a known malicious file hash. The email used is not a normal email address. There are a few misspellings and they are sharing a password. This ticket should be escalated as there is a high chance the file was malware

Additional information

Known malicious file hash:
